## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Yang (US Patent 6135718).

Claim 1, Yang discloses a circuit for controlling the speed of a fan motor comprising a differential amplifier U1B having two inputs, one of which receives a feedback signal and the second input receives a reference voltage signal, as shown in figure 2.

Claim 2, Yang describes in column 4 lines 43-47 that a voltage divider consisting of resistors Ra and Rb is connected to one of the inputs of the differential amplifier U1B.

Claim 3, Yang shows in figure 2 the feedback signal inputted to the differential amplifier through resistor R9, wherein R9 and R10 that is connected between the second input and the output of the differential amplifier are used to set the amplification degree of the differential amplifier.

***Claim Objections***

3. Claims 4-6 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, claims 4-6 have not been further treated on the merits.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The documents cited disclose other systems for controlling the speed of a fan motor.
